

# ATLONA 1x4 VGA DISTRIBUTION AMPLIFIER WITH AUDIO AND CONSTANT POWER ON

We designed this unit for high profile projects which have to work all the time without interruption such as Airports, Train Stations, Bus Stations, Military bunkers, Security offices, Museums, Theaters, Submarines, Ocean Ports...etc. We had built the VGA14A with ability to be powered through VGA Port or USB or 5V DC, you can use either or in high profile applications we would suggest both power supply and VGA as if power supply fails, the VGA will always work as long as computer is turned on. It can however work on just the VGA port, no 5VDC or USB is needed. Only product on the market which is so commercial.

Weight	3.00 lbs
SKU#	AT-VGA14A

## FEATURES:

- Self powered (via VGA Cable), power supply is only required for 2k resolutions to be displayed through all 4 outputs
- Optional USB power
- Plug & Play - no drivers or software required
