Connection Diagram

Warranty:

3 year manufacture warranty (parts and labor)

Atlona HDMI booster is designed to correct few standard problems with long hdmi cables that may appear and allow you to extend original cable for additional 15FT

Note: The original cable can be up to 66ft

If your cable is over 30ft and signal comes in and out

If you cable is over 20ft and signal is sparkly (red and green sparkles)

If cable is over 30ft and you get no video or audio signal through HDMI

The AT-HDMI-EQ will perform best if placed at the end of the cable with the short extension cable to the display. The extension cable should not be more then 13ft.
