

# Tiger Ditcher

The Boom Ditcher can be mounted in a matter of minutes to the Bengal Series or the Saber Series of Boom Mowers. The TIGER DITCHER is available as a dedicated tool or as an attachment to the inner or outer boom arms. The DITCHER can reach up to 21.5' from the center line of the tractor when mounted on the TIGER Saber Boom.

Standard Cutter Head is equipped with three heat treated, self-sharpening, replaceable knives and wear plates.

With a 22" diameter cutting width the TIGER ROTARY DITCHER can move the material at a steady pace. The hydraulic deflector chute lets you place the spoils where you want them.
