

FH Bonn Cool Hand™ Poli-Sleeve

The smart redesign of the FH Bonn **Cool Hand™** Poli-Sleeve offers a revolutionary way to remove stains and starch build-up from laundry press heads. In addition, the cleaning surface will not retain or transfer heat, which protects the operator's hand and forearm from exposure.

The FH Bonn **Cool Hand™** is constructed of high performance nylon fibers that are impregnated with flexible resins and minerals. This new technology will provide aggressive cleaning without scratching or scarring the pressing surfaces.

The abrasive surface of the FH Bonn **Cool Hand™** Poli-Sleeve provides excellent cleaning along with consistent wear, allowing the Cool Hand to hold its shape use after use. The FH Bonn **Cool Hand™** is easily cleaned with a mild soap and water.
