

Model TBH Heavy Duty Body

Petersen's model TBH trash dump body was designed for heavier operations like sidewalk removal, large stumps and C&D waste. Heavy duty style body is also mandatory for higher volume bodies.

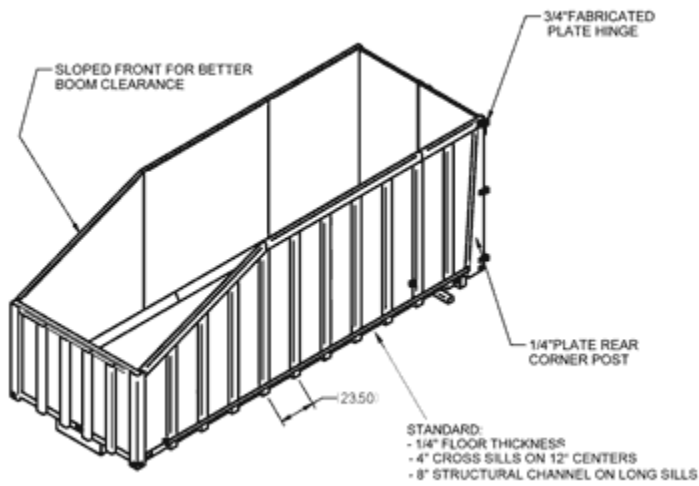

- Sizes range from 20-45 cubic yards
- Three year structural warranty
- Achieves a 45 degree dump angle without ground contact
- To avoid rust, design incorporates no 90 degree angles on lower portion of body sides
- All body lights are recessed or flush mounted
- Body hinges are greaseless 3/16" fabricated plate, three on each side

Model	Length (ft.)	Volume (cu. Yd.)	Side Ht. (ft)	Length	Min. GVWR
1820TBH	18	20	4	168 C/A	33000
1824TBH	18	24	5	168 C/A	33000
1828TBH	18	28	6	168 C/A	33000
2026TBH	20	26	5	186 C/A	35000
2030TBH	20	30	6	186 C/A	37000
2234TBH	22	34	6	192 C/T	52000
2240TBH	22	40	7	192 C/T	56000

BODY FLOOR 1/4" single sheet steel plate. Includes 3/16" reinforcement plates continuously welded between floor and sides.

CROSS SILLS 4" structural channel on 12" centers.

LONG SILLS 8" structural channel.

HEADBOARD 3/16" steel continuously welded to the floor. Loops welded to front for holding tools.

BODY SIDES 3/16" steel continuously welded to the floor.

SIDE POSTS 3" x 5" x 10 gauge formed channel on 24" centers. 1/4" steel plate formed rear corner posts.

BARN DOORS Top and bottom positive locks. Three hinges per door with two 5/8" thick straps.

BODY HOIST Venco 6620 dual cylinder hydraulic cylinder hoist. 22 ft. long bodies receive larger Parker S64 single telescopic hoist. Body achieves 45 degree dump angle without contacting the ground.

BODY LIGHTS Meets federal lighting standards. Elevated brake lights for increased visibility and safety.

PAINT High grade primer and enamel finish.
