ApolloXpress (cont'd)

SMALL DIAMETER FITTINGS

The APOLLOXPRESS™ small diameter fittings (1/2" - 2") feature copper-body construction for most configurations. The lead-free design offers a *Leak Before Press™* feature. The forward lip aids in the alignment of the copper tube during insertion, reducing the risk of o-ring damage. These fittings are approved for underground applications and are ideal for service and repair. Pre-lubricated, they are fast and simple to install. **Copper fittings are Made in the USA.**

LARGE DIAMETER FITTINGS

The APOLLOXPRESS™ large diameter copper fittings (2-1/2" - 4") feature a patented solid cross-section grab ring, creating significant contact with the tube after pressing. The *Leak Before Press™* feature allows water to flow past the sealing element during pressure testing if the fitting has not been pressed. Last, but certainly not least, we've added a visual element: if the break-away band is still on the fitting, it needs to be checked. **Made in the USA.**

Apollo Fire Protection System Solutions

XPress, by Apollo Fire Protection System Solutions is the thread and groove free method of joining fire sprinkler piping cleanly and in less time. Contractors choose to use XPress rather than threaded systems for the labor savings, peace of mind and everything in-between.

The XPress systems' innovative advancements include a tool that weighs less than ten pounds and a full line product offering utilizing state of the art manufacturing techniques with 100% on-line quality testing. These innovations provide contractors multiple benefits including labor savings, a clean, grease free joint and consistency when making connections.

XPress, perfect for both retrofit and new construction projects is ideal for hospitals, hotels, dormitories, apartments, food and beverage, petrochemical, schools, places of worship and exposed residential basements to name a few.

XPress...for the perfect fit!"
