

HARMAN KARDON® HEADPHONES **NC**

Introducing the NC model over-ear headphones, part of the first-ever line of Harman Kardon® headphones. Blending sophistication and simplicity, acoustics and aesthetics, NC headphones embody the essence of “Beautiful Sound.”

Beautiful sound. To go.

Harman Kardon® NC headphones feature an exclusive acoustic system that integrates superb mechanical design, materials and electronics. User-exchangeable bows, self-adjusting housings, soft leather cups and slow-retention ear-cup foam ensure a comfortable fit and an optimal acoustic seal around the ear. The NC model employs the proprietary HARMAN closed-loop active-noise-canceling technology developed for acoustic installations in luxury cars. The USB-rechargeable NC headphones have a battery that lasts up to 40 hours. Unlike any other noise-canceling headphones, even when the battery dies, the NC headphones will play back. Lightweight and comfortable, NC headphones let you take beautiful sound with you wherever you go.

Highlights

- Sophisticated, modern design
- Proprietary, active-noise-cancellation technology
- Passive playback mode
- Optimized driver system
- Sonic clarity and accuracy even at low volume levels
- User-interchangeable metal bows and self-adjusting housings
- Slow-retention premium foam
- USB-rechargeable
- 2D folding mechanism and premium carrying case

KEY FEATURES

HARMAN KARDON® HEADPHONES NC

From high-quality materials to exceptional acoustic performance, these new headphones reflect the Harman Kardon commitment to innovative industrial design and uncompromising sound quality.

Sophisticated, modern design

Harman Kardon NC headphones offer high-tech performance wrapped in an elegant package and interface. With their blend of sandblasted steel and black-matte housings, the NCs' design and function complement Apple products while reinforcing the sophisticated elegance of the Harman Kardon brand.

Proprietary, active-noise-cancellation technology

NC headphones adapt the active-noise-cancellation technology developed by HARMAN for luxury cars. This technology analyzes and optimizes the audio signal before it reaches the listener's ears. A microphone inside the ear cup provides the most accurate noise cancellation.

Passive playback mode

With other noise-canceling headphones, the music ends when the battery dies. Not so with NC model headphones. By connecting the headphones to the playback device using a supplied bypass cable, you can enjoy continuous playback (minus the noise-canceling) even when the battery is dead.

Optimized driver system

High-performance 1-5/8-inch (40mm) drivers produce an excellent frequency response (16Hz–20kHz), wide dynamic range and high sound-pressure levels. As a result, NC headphones deliver accurate sound and extended bass response.

Sonic clarity and accuracy even at low volume levels

The NCs' acoustic engineering and passive-noise reduction mean that you can hear music and other audio content clearly at low volume levels, so you can enjoy all the music definition without all the volume – and that's safer for your ears.

User-interchangeable metal bows and self-adjusting housings

NC headphones come with two headband bows (small and large) to optimize fit and improve acoustic performance. Rugged steel hinges enable the NCs' housings to swivel in two dimensions. This enhances comfort and maintains an ideal acoustic seal around the ear.

Slow-retention premium foam

Premium foam in the ear pads contributes to the NC headphones' excellent passive-noise reduction and extended bass response. The slow-retention foam helps maintain an acoustic seal around the ear, which keeps outside noises out and also keeps the listener's music from disturbing others.

USB-rechargeable

NC users can charge the headphones on the go with a supplied USB cord, which eliminates the need for batteries or an extra charger.

2D folding mechanism and premium carrying case

The NC ear cups fold flat when they're not in use, making the headphones easier to transport and store. The flat-folding headphones and included carrying case slip easily into bags or briefcases – which makes the NCs especially convenient for travelers.

SPECIFICATIONS
