

LAUNDRY – COMMERCIAL

Fluff

Fabric Softener

Background

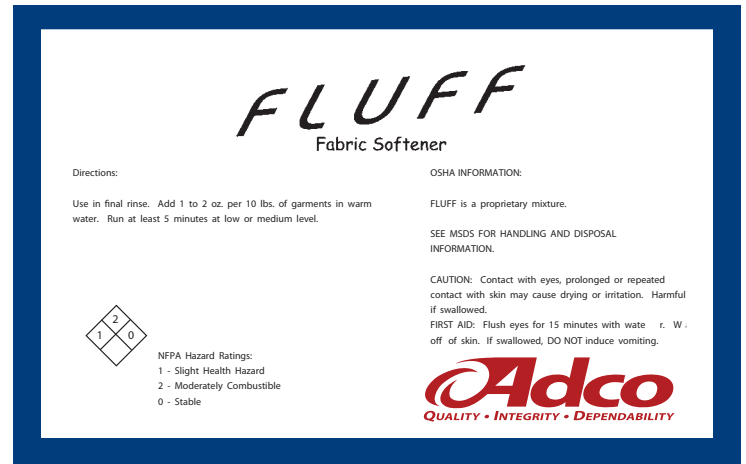

Fluff was formulated to be part of the Adco 5-Part Laundry System. This system is designed for larger commercial laundry operations where flexibility is required for cleaning performance relative to varying levels of detergent and alkalinity. The Fluff formula is an economical way to soften articles processed using the 5-Part Laundry System.

Typical Application

Commercial laundry applications include larger hotels, linen plants, hospitals as well as other multi washer operations conducted in a classic manufacturing/process oriented environment. Fluff is necessarily used with the other products that are part of the 5-Part Laundry System; Flex, Liquid Sour, ALK 20, and Bleach.

Top 3 Highlighted Characteristics

1. Softener
2. Water
3. Systems Savings

Fluff

	Code	Description
Process		
Solvent Introduction	S - W P - I P - L	Water Injection Liquid Product
Stimulant & Treatment Formula	A - 12	Softener
Economics	T - 1	Integrated Savings
Recommended Stimulants & Treatments		
Degreaser		Degreaser
Alk20		Alkalinity
Liquid Sour		Sour
Oxygen Bleach		Bleach
Chlorine Bleach		Bleach
Scent Away		Odor Neutralizer
AllStar		Odor Neutralizer
Recommended Detergents		
Flex Plus		Detergent
Flex		Detergent

Available SKUs

FLUF01G	6 gallon Case
FLUF06P	6 gallon Pail
FLUF20D	20 gallon Drum
FLUF55D	55 gallon Drum
