Power: Via the HVAC system, typically 24 VAC

Size: 4.125" x 3.125" x 1.94" (W x H x D)

Weight: 2 lbs

Total Control Lighting Solutions

URC Lighting Control by Lutron® offers complete control of lights. Our products are simple to install, easy to program, and a pleasure to use. Offering wall-mounted dimmers, wall-mounted switches and table top lamp dimmers, our solutions give you a one-stop-shop for whole-house lighting.

Installation requires no new wiring and no black boxes. Add an RFTX-1 transmitter to an MRX-10 or MRX-1 Controller and Total Control communicates directly with each dimmer, switch or lamp dimmer.

Programming is simple, too. URC Accelerator helps you configure the scheme and automatically compiles the macros.

Home owners love URC Lighting because it is ultra-easy to use. They can change lighting scenes anytime by using the easy press-and-hold method they use to set an FM station on their car radio.

Lighting control delivers convenience, a higher level of family safety, and saves energy dollars. URC offers a premium product backed by market-leading brand names people trust. Coupled with Total Control, URC Lighting by Lutron is your scalable entry into home lighting control. It also communicates flawlessly with Lutron RadioRA® 2 and Lutron's Clear Connect RF technology via a custom Total Control two-way module.

URC lighting control products also include accessory dimmers and accessory switches for 3-pole and 4-pole installations. Please refer to the complete URC Lighting by Lutron price list SKU numbers, load information and ordering details.
