

Hear the truth™

# JBL® TIM MCGRAW TMG21 HEADPHONES

High-performance, in-ear headphones

Sound matters to three-time GRAMMY®-winner Tim McGraw. And it certainly matters to JBL® engineers. So when the artist and engineers teamed up to design in-ear headphones, superior sound was no accident. The JBL Tim McGraw Artist Series headphones are voiced to deliver the realistic, flat frequency response music professionals demand. High-performance drivers reproduce your favorite music as the artist intended it to be heard, while the silicone sleeves block out ambient noise and ensure a comfortable fit in the ear canal. The lightweight TMG21s come with a protective carrying pouch, so you can take great JBL sound with you wherever you go.

## FEATURES

High-performance 9mm drivers

Closed-back ear-canal design

Silicone sleeves

99.99% oxygen-free cable

Distinctive colors and graphics, including Tim McGraw's signature

Custom Tim McGraw/JBL carrying pouch

## ADVANTAGES

Impressive frequency response (13Hz – 22.5kHz)

Noise-isolating design blocks ambient noise, minimizes leaking

Three sizes (S, M and L) are included for optimum fit

Clean audio-signal transmission

Set the TMG21 apart from other headphones

Keeps cable from tangling and extra sleeves in one place

## BENEFITS

Accurate sound; wide dynamic range; exceptional bass

Outside sounds stay out; more music stays in

More comfort, less ambient noise in the ear canal

Clear, precise sound

An appealing blend of style and performance

Protects headphones

“As an artist, I want my fans to hear and experience music the way I do. So I’ve teamed up with JBL to bring you a line of headphones that have been tuned to do just that. Truth is in the details, and I’m proud to bring you the truth in partnership with the leader in sound, JBL.” – Tim McGraw
