

Wireless Message Displays

Visiplex offers a selection of wireless alphanumeric message displays. Our LED display series includes a variety of sizes and formats to provide easy time and message viewing to accommodate a wide variety of application environments. Messages are generated from AlertWave paging encoders, alphanumeric data entry devices or preprogrammed messages initiated by an alarm or panic button.

Each wireless display is assigned a unique ID code to receive its own addressable messages and can be assigned with additional group codes to receive group messages with other LED displays.

Wireless LED Display Advantages:

- Perfect solution for silent alerts and facility wide text/time display
- Easy installation with no physical adjustment
- Wide range of operating temperatures
- Built-in ultra-sensitive receiver for facility wide signal reception
- Wide selection of sizes for indoor/outdoor alphanumeric message display
