

All-in-one instant signage solution

- HMP: extremely reliable non-PC based media player
- Powered by Fusion, the intuitive browser based content manager
- Get up and running with professional templates and skins
- Suitable for any type of digital signage application
- A range of additional style packs available

Key Benefits

- No software installation
- Simple to use
- No recurring licenses
- Native content scheduling
- Highly flexible customizable skins (scrolling news, weather forecast)
- Manage user rights

Features for restaurants and bars*

Intuitive drag & drop operation with any browser, no special skills or training required

Full screen slide-show of products or advertisements (images, videos, slides)

Editable slide fields (title, text, picture) can be edited on-the-fly for reservation information

Schedule date and time to display slides (e.g. 'Employee of the week' or 'Happy Hours')

Configurable layouts (skins) with logo, weather, time & date, and live news feeds

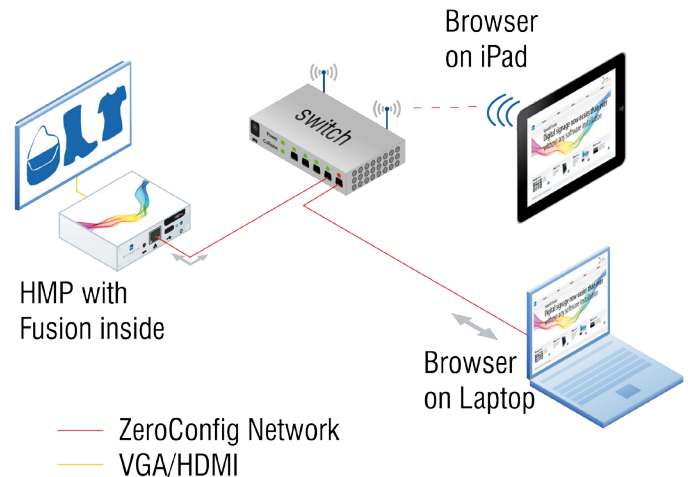

Special promotion slides with editable price, picture and text slide-show and highlights

* Additional packs for other applications are available on www.spinetix.com/resources/fusion

How to use

Get your digital signage network running in no time, without training, hassle or complexity:

- 1 Connect your device running the preinstalled SpinetiX Fusion software
- 2 Upload media and on-the-fly editable skins and templates using a web browser
- 3 Schedule and publish professional-looking content

Application example

A waiter without specific skills can manage the restaurant display to create and update:

- Scheduled bar events
- Instant menu updates and live messages
- Special highlights / happy hour information
- Employee of the week
- Table reservations
- Crawling text for online news
- Restaurant or bar logo
- Daily local weather forecast
