AlertWave

## VS1502 - Wireless Alphanumeric LED Display

The VS1502 Wireless Alphanumeric LED Display is designed with easy time and message viewing to accommodate a wide variety of application environments.

The VS1502 supports 6 activation codes (ID's) for individual activation or membership activation in 5 separate groups. Creating groups provides the ability to activate multiple devices using a single transmission from a main wireless paging controller, such as the **VS4800** or **VNS5100**.

The VS1502 can be set to default time display mode. In this mode, the VS1502 switches to alphanumeric message mode only when a text message is received. When the text message lifetime elapses, the VS1502 reverts back to time display mode.

Time Display Mode

Key Features:

- **One-Line Alphanumeric Display Format**
- **Text Scrolling**
- **Alternate Time Display**
- **Wall or Ceiling Mount**
- **Supports Multiple Display Effects**

26.72"
