

SANUS HDMI Cables

The Pivoting HDMI cable and the Super Slim HDMI cable were made for tight spaces. With the new connector head, the Pivoting HDMI cable can swivel up to 180° for easy placement behind mounted TVs and ports. And with ultra-flexible design, the Super Slim HDMI cable, allows ultra-thin TVs to sit almost flush with the wall thanks to the 40% shorter connectors. With the ability to support video resolutions beyond 1080p, both new HDMI cables will work perfectly with next-generation displays.

SANUS Pivoting HDMI Cables

HD 1080p +
Handles 1080p video resolution and beyond for next generation displays

Head pivots 180° for placement in hard-to-reach ports

3D
Works with 3D TVs and components

Ethernet channel delivers high-speed Internet connectivity to compatible devices, eliminating the need for a separate cable

SANUS Super Slim HDMI Cables

HD 1080p +
Handles 1080p video resolution and beyond for next generation displays

Ethernet channel delivers high-speed Internet connectivity to compatible devices, eliminating the need for a separate cable

Connector is 40% shorter than conventional HDMI cables for easy installation behind ultra-thin TVs

Ultra-flexible cable allows for easy bending to make connections in tight spaces
