

# ENGINEERING DATA SHEET

The Razorblade<sup>TM</sup> is a 24" x 48" x 8" quadratic residue diffuser (QRD) that will effectively break up standing waves and directional reflections to provide a sense of air and increased space in any room. Ideally suited for recording studios, theaters and critical listening environments the Razorblade features a series of 17 wells of varying depth that combine to effectively scatter frequencies as low as 400Hz.

The Razorblade is constructed using a combination of furniture-grade plywood for durability, and medium density fiberboard slats for increased rigidity and mass. Ships fully assembled in an attractive black finish.

## SPECIFICATIONS:

FRAME MATERIAL	Baltic Birch outer frame, MDF inner
DIMENSIONS	24" (610mm) x 48" (1219mm) x 8" (203mm)
ORDER NUMBER	Z840-2400-00
COLOR	Black, paintable

## IMPULSE RESPONSE TEST:

### Graph-1: No Diffusion

## Graph 1: Room without Diffusion

The first spike represents the rooms early, or primary reflections. The second spike indicates the secondary reflections or room ambience.

The secondary is a full 10dB louder than the early reflections and most of the energy is bunched up at one point in time showing a peak. Graph-2: Razorblade Quadratic Diffusion

#### Graph 2: Room with Diffusion

Diffusion works by dispersing peak acoustic energy and spreading these spikes over a broader time span, creating secondary reflections that decay gradually and evenly. Diffusion is perceived as a natural wash of reverberation.

#### APPLICATION:

Diffusers on the rear wall span the width of the listening position and break up front-to-back waves.
