

ACTIVATIONS SINGLE DROP • DUAL DROP • WORLD DROP • AFTERMARKET CARD READERS • CENTRAL PAY

Available in 20 lb (7.8 kg), 30 lb (11.8 kg), 40 lb (18.0 kg), 60 lb (25.5 kg), 80 lb (35.4 kg) and 125 lb (54.4 kg) capacities.

HARDMOUNT WASHER-EXTRACTORS

Flexible water usage. High-speed extraction. This sublime marriage of form and function will be the crown jewel of your laundry operation.

Many factors contribute to your laundry's profitability, but most prominently featured are its washer-extractors. These units, by virtue of their size and speed, are customer draws and profit producers. Successful coin laundry owners understand this and will install a variety of sizes. The heavy-duty construction and reliable operation guarantee your washer-extractor will be in service for years to come.

HARDMOUNT WASHER-EXTRACTOR CONTROLS

QUANTUM™ GOLD

In addition to its networking and off-site management capabilities, Quantum™ Gold offers a total of 27 cycle combinations, 30 programmable water levels and customer-centric offerings such as a "lucky cycle" for loyal customers. PC programming is easy and fast, while time-of-day pricing can be scheduled to increase business on slower days. Cycle modifier keys allow additional profit opportunities and the ability to interface with your card payment system of choice. Quantum Gold is designed to help you maximize your profitability.

QUANTUM SILVER

Quantum Silver gives owners a variety of profit-producing features, including nine cycle combinations, multi-level vending and time-of-day pricing. Programming is easily accomplished through a PC via an infrared port on the control, and can interface with your card payment system of choice.

QUANTUM STANDARD

For owners requiring basic management options, Quantum Standard comes with four cycle selections and manual programming. It also offers a maximum extraction speed of 82 G-Force (100 G-Force on 60 lb (25.5 kg) and 80 lb (35.4 kg) models) and can interface with your card payment system of choice.

FEATURES

SEALS AND TRUNNION SHAFT

Triple-lip seals and a stainless steel sleeve around the trunnion shaft extend bearing life by preventing the damaging effects of moisture.

DOOR HANDLE AND LOCK MECHANISM

The Speed Queen door handle is ergonomically designed for ease of operation, while its locking mechanism is extremely reliable, reducing the risk of alignment problems and door-lock error codes. The control also features a positive locking indicator.

FOUR-COMPARTMENT SUPPLY DISPENSER

A four-compartment supply dispenser saves time, offers a temperature fill and eliminates over-sudsing conditions. Customers can add two detergents, bleach and softener, all at the beginning of the cycle.

140 G-FORCE EXTRACTION AVAILABLE ON ALL QUANTUM GOLD WASHER-EXTRACTORS

On a typical 30 lb (11.8 kg) washer, choosing the 140 G-Force spin speed option can remove an extra 1/2 gallon (1.89 Litres) of water from the load. This higher spin speed will help move customers through your store faster, and cut your gas usage by as much as 15 percent.

PC PROGRAMMING CAPABILITY (Gold and Silver only)

Manually programming a new or rehabbed store can be time-consuming and prone to errors. The simple, accurate Quantum Coin Software allows you to preset your control program on a PC and download your custom cycles, vends and other features into your machines in minutes, instead of hours.

SECURE HIGH-CAPACITY COIN VAULTS

Rugged top covers and locks, combined with a pry point-free design, offer you the highest available level of security. Our 40 lb (18.0 kg), 60 lb (25.5 kg) and 80 lb (35.4 kg) models now have increased coin capacity to accommodate these machines' higher vend prices.

STURDY FRONT PANEL

Our unique front panel provides an excellent fit and superior finished edge around the door.
