

FRONT LOAD WASHERS

Energy Efficient. Cost Efficient. Everything you need to reduce operating costs, from our low water usage to our high-speed extraction.

Our front load washers are highly efficient, reducing operating costs with low water usage, using as little as 12.8 gallons (41.3 litres) per cycle, a savings of more than 40 percent compared to some commercial top load washers. A 1,000 RPM spin speed increases overall laundry efficiency by removing more moisture from loads. Less moisture translates into reduced drying times. Fast cycle times get the job done quickly, while the double load washtub provides lots of room for larger loads.

FEATURES

Inverter drive-controlled motor, with out-of-balance logic, manages and redistributes unbalanced loads for uninterrupted wash cycles

Available in 18 lb (8.0 kg) capacity

High spin speed up to 1,000 RPM removes more water from clothes, speeding up drying cycles and lowering dryer energy usage

FRONT LOAD WASHER CONTROLS

E-MECH CONTROL

The E-Mech control features a straightforward design that offers users simple water temperature and fabric selections and uses cue lights to monitor progress through the wash cycle.

MICRO-DISPLAY

Our Micro-Display Control (MDC) keeps users informed throughout the wash process with cycle status lights and a digital cycle countdown. MDC offers four cycle selections, and basic audit features.
