

# Choose the Ocularis Feature Set that's Right for You

Ocularis is offered in four feature sets, designed to meet the needs of organizations of all sizes and structures, from single-location retail outlets or schools to multiple-site, complex municipal and campus installations.

To find the best match for you, find the type of organization and installation that fits you the most.

## Ocularis PS

Designed for organizations with limited need for active live monitoring and alerting. **Ocularis PS** is the ideal IP video surveillance solution for installations operating in a single or at multiple locations, running a relatively small number of cameras in each.

## Ocularis CS

For large distributed organizations with extended command and control needs. **Ocularis CS** supports that VideoWall and OpenSight add-ons, allowing the control of video walls at multiple command and control centers, and incorporating camera streams from other Ocularis installations.

## Ocularis IS

Competitively priced, **Ocularis IS** was designed for organizations operating at multiple locations with no size limitations. It supports integration with access control, video analytic and other 3rd-party systems, meeting the needs of organizations with dedicated resources for live monitoring and alerting.

## Ocularis ES

**Ocularis ES** brings a higher level of efficiency to recording system maintenance. Intended for very large and complex multi-site installations, it incorporates a central video recording system management utility, which eliminates much of the complexity of managing many hundreds and thousands of cameras at multiple sites.

Ocularis Feature Set	PS	IS	CS	ES
Single-camera increment licensing	⊙	⊙	⊙	⊙
Scalable for unlimited number of cameras	⊙	⊙	⊙	⊙
Unlimited number of servers at multiple sites	⊙	⊙	⊙	⊙
Bundled with Ocularis Client (unlimited installs)	⊙	⊙	⊙	⊙
