

## Fiberglass Defibrillator Cabinets and Storage

Thomas Products fiberglass Defibrillator cabinets are suitable for use in hospitals, ambulances, outpatient care facilities, GF practices, health clubs, sports facilities, public and private buildings, airplanes and other facilities where large groups people gather. The Thomas Products cabinet is designed to protect many types of defibrillators and AEDs included but not limited to those manufactured by Cardiac Science, GS-Eletromedizin, LifeCor, Lohmeier, Medtronic and Metrax. Thomas Products fiberglass enclosures are manufactured with high quality materials and designed to protect the equipment from exposure to harsh UV rays, chemicals, moisture, dust, salt air, insects, and temperature extremes. Thomas Products fiberglass cabinets are manufactured under U.S. Patent No. 4,998,587 and are available in a variety of UV inhibiting colors as well as interiors designed to meet your specifications. The rugged and durable construction of Thomas Products fiberglass cabinets combine to produce a dependable and virtually air tight enclosure that will last much longer than steel, wood, aluminum, or plastic cabinets. Thomas Products fiberglass cabinets can be wall mounted, attached to handrails, bulkheads, or designed to be free standing.
