

# NORTH AMERICAN FIRE HOSE CORPORATION

The difference is... *your* margin of safety.

## Durattack 1000™

### Durattack 1000™ Features

- Exclusive **DURA-CORD®** advanced air-textured Nylon 6-6 continuous filament warp yarns, resulting in superior “toughness”, abrasion resistance, cut resistance, tear strength and heat resistance when compared to competitive nylon, spun polyester or filament polyester warp constructions
- Unique Ultra-Shield™ high-performance polyurethane coating seals each and every fiber in the bundle, further improving the abrasion resistance, reducing moisture and chemical absorption, and providing vivid color-coded identification
- Superior “fit” between inner hose and outer jacket eliminates bunching, wrinkling and snagging of outer jacket
- Increased thickness of nitrile rubber inner hose eliminates leaking and/or “soaker hose” problems encountered with competitive products
- Very low hydraulic friction loss encountered during pumping operations
- Unsurpassed kink resistance at low pressure, making it the perfect choice for low pressure nozzle applications
- Anti-Burst technology significantly reduces potential for catastrophic burst failure while hose is charged

Applications include: Attack, CAFS, High Rise  
Available in 50 and 100 foot lengths

Made in the USA

HOSE SIZE	SPECIFICATION NUMBER	ACCEPTANCE TEST PSI	SERVICE TEST PSI	BOWL SIZE	WEIGHT PER 50' UNCLD
1¼"	DURATTACK	1000 PSI	500 PSI	2¼"	20 lbs.
2½"	DURATTACK	1000 PSI	500 PSI	3"	27 lbs.
