## Accessories – Backflow Preventers

### 40 200 BV BLEED VALVE

### BLEED VALVE

Test valve used to provide accurate readings in field test of the Double Check Valve backflow preventers. Recommended in USC testing procedures. Benefits include quick connections, quick bleed off of testing lines and useful in tight locations.

### VALVE SETTERS

Apollo Valve 4An Setters are specifically designed to match the mounting dimensions of the 4An products. The three-piece configuration simplifies installation and eliminates the need for thrust blocks between the elbows. All hardware is stainless steel and the entire unit is FDA Epoxy coated inside and out. The mechanical joint connections are to AWWA C153 and the flanges are to ANSI B16.1 Class 125.

### MODEL RP 40 & RP 4A BACKFLOW PREVENTERS

### AIR GAP DRAIN

For installation with Conbraco's RP 40, RPDA 40, RP 4A, RPDA 4A, RP 4An, and RPDA 4An Series Reduced Pressure Principle backflow preventers.

The Apollo Air Gap Drain (AGD) is designed to funnel minor relief valve discharges, due to line pressure fluctuations and /or minor check valve fouling, into the drainage system. Drain piping is easily attached to the drain's threaded bottom.

*Note: The AGD is designed to collect expected minor discharges due to fouled checks or pressure fluctuations but not the full discharge capacity of the relief valve.*
