

Clarion

Projection perfection.

Improve your image—with a Clarion projection screen. How? The viewing surface is perfectly flat. And a perfectly flat viewing surface means perfect picture quality. The 2" wide black frame is constructed of beveled, extruded aluminum, and assembles quickly and easily. Z-Clip wall mounting brackets included. Available in sizes up to 14' x 14', in AV, NTSC, HDTV, 16:10, WideScreen, or CinemaScope Formats. Permanent wall mounting brackets included.

System Options

- **Viewing Surfaces**—M1300, M2500, HiDef Grey, AT1200, AT Grey, or Cineflex.
- **Custom Sizes**—Any size up to the maximum standard size. Overall size, including frame, equals image area plus 4".
- **Frame Finishes**—Black aluminum is standard. Cover the frame with optional velvety black, Vel-Tex to eliminate reflections.

Onyx

Quick and easy assembly plus adjustable surface tension—without snaps.

An attractive frame, a new fabric tensioning system, and ease of assembly make Onyx the leader in permanently tensioned screens. The 4" wide beveled, extruded aluminum frame interconnects on site with one simple hand tool that Draper provides. Each side piece slip fits tightly to injection molded plastic corners, forming perfectly mitered edges.

A radical new approach to fabric attachment will amaze even the toughest of critics. There are no snaps! Uniform tension is applied to the entire surface area, so the surface is perfectly flat. Unique fabric retention system enables you to adjust the surface tension (up to 1½") in just seconds, without tools. Available in sizes up to 20' x 20', in AV, NTSC, HDTV, WideScreen, or CinemaScope Formats. Permanent wall mounting brackets included.

System Options

- **Viewing Surfaces**—M1300, M2500, HiDef Grey, acoustically transparent AT1200 or AT Grey for front projection or Cineflex rear projection vinyl.
- **Custom Sizes**—Any size up to the largest standard size, depending on viewing surface. Overall size, including frame, equals image area plus 8".
- **Frame Finishes**—Black aluminum is standard. Cover the frame with optional velvety black Vel-Tex to eliminate reflections.
