CONNECTIONS SMARTDECK POWER OPTIONS

Juice Power System

Softwired Components

SmartDeck Table with Hardwired Components

FEATURES

- Connections SmartDeck tables can be powered using hardwired or softwired components. *(Note tables ordered prior to July 27, 2009 may only be softwired with an ECF6 electrical unit or the Juice Power System.)*
- Hardwired components use a four circuit system and allow tables to daisy-chain off one another and are powered directly from the building electrical infrastructure. Requires installation by a licensed electrician. *(Note only tables ordered on or after July 27, 2009 are able to use hardwired components.)*
- Softwired components use an individual 6-outlet power strip that plugs into a standard outlet or the Juice Power System. Optional Cord Bin Bridge closes the gap between tables. *(Note any SmartDeck table can use the ECF6 6-outlet power strip and Juice Power System but only tables ordered on or after July 27, 2009 are able to use Cord Bin Bridges.)*
