

Store, Charge & Update LAPTOP 16H

Horizontal 16 Bay Laptop Storage & Recharging Trolley

- Horizontal storage and charging of up to 16 Laptops
 - Unique upgradeable power module
- Offers excellent access and cable management
 - Supports Data Transfer
 - Energy Saving Programmable Timer

Enables you to store, charge and update up to 16 laptops from a single mains socket and LAN point, plus the uniquely upgradeable/replaceable power module design offers you a truly future-proof solution.

Store, Charge & Update

LAPTOP 16H

Horizontally stores, charges and updates up to 16 x 17" laptops from a single wall socket and LAN point

Data Transfer

Updating a full set of laptops is simple. The LAP 16H features a built-in 19" rack for mounting a network switch (switch not included). With fans and network cable available as fitted or retro fitted options, all laptops can be connected to the LAN even whilst charging.

Power Management & Energy Saving Timer

The built-in Power Management system not only protects your laptops and prevents your building's circuits from being tripped, but it also features an energy-saving timer unit with 2 programmable timer options, which can be set to start charging over 2 separate time periods in one 24 hour cycle

This could be from 6:30am to 8:30am ready for morning classes and then again at 12pm to 1pm ready for afternoon classes.

The timer can also be set to charge your laptops during the evening or weekend to take advantage of off-peak energy supply hours, helping to reduce your electricity bills.

Low maintenance

All the electronics are housed in easily removable modules which, in the event of a problem, can be simply and safely swapped out by a non-technical person, greatly reducing down time and costs. The unique swap-out design of these modules also means that as your school's requirements change, the module can also be easily upgraded.

Construction

Robust all-steel construction provides a significant theft deterrent while the separate lockable ICT technician door offers secure access to the power module to prevent unauthorised tampering. Overall dimensions: 1018W x 550D x 1107mmH. Features 4 robust castors for excellent manoeuvrability.

Certifications

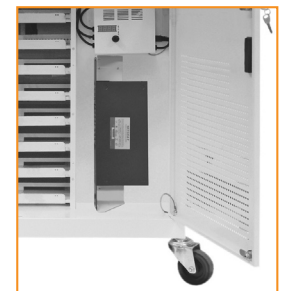

All Bretford charging trolleys are fully tested and independently certified to BS EN 60 335-1: 2006 + A2: 2006, BS 60 950 -1: 2006/A1: 2010 ensuring the highest levels of electrical/build safety and complying with the latest HSE manufacturing guidelines on electrical safety. 12 Year Guarantee (2 Years on electrics).

EPM Version

Features 2pin & 3pin power adaptor leads, which provide excellent cable management by dispensing with the laptop power lead and eliminating cable spaghetti. Quick and easy to set up, plus allows storage and charging of different laptop brands.

Intelligent Charging Version (IC)

Features an intelligent charging system configured to the specific laptops being used and offers ultra-safe low voltage charging. The unit is supplied with built-in connecting leads, meaning no AC adaptors are required as the leads plug directly into the laptops.

Code	Description
LAP16H B/EPM	16 Bay Horizontal Charging Trolley with EPM
LAP16H F/EPM	16 Bay Horizontal Charging Trolley with EPM & Fans
LAP16H F/N/EPM	16 Bay Horizontal Charging Trolley with EPM, Fans & Network lead loom
