PowerPro™ SD

wireless

Need a flexible, portable PA system that can adapt to crowds of varying sizes and operate without constant tech support? The PowerPro is the first portable PA to transmit wireless audio 300' to an unlimited number of Califone companion speakers. You can address small groups up to 1,000 people either indoors or outdoors. In addition to being a school favorite, it's also used by hotels and conference buildings, houses of worship, emergency response situations, and event venues of various sizes.
