

Extenders

Atlona extender solutions help overcome the limitations of analog and digital formats. They affordably and reliably deliver single and multiple signal formats, media, control and data beyond the limits of traditional cabling.

Atlona HDBaseT™ Extender Collection

Our collection of HDBaseT extenders offers up to 4Kx2K at longer distances, power over category cable (PoCo), and options for control, distance, form factor, and connectors, so you can customize an installation with just the right features while reducing costs. Choose RSNET for the longest distances and complete control; ROADNET for rental and staging applications; or DVI RSNET for electronics with DVI connectors. Choose WP (wall plates in US and UK form factor) extenders for use behind displays. Choose IR for applications that require only IR control or HD for applications that rely on local control. Compatible with Atlona PRO3HD matrix switchers and HDCAT distribution amplifiers.
