

Adapt and Move Forward

R H O M B I I

*What would you do with a training table that
was designed to accommodate the needs of a space?
What if morning, noon, or night you could easily
reconfigure those tables to shape the
experience of the people in your environment?*

{ 9:00 AM - Cross-Cultural Psychology }

Set Up. Plug In. Lecture Time.

At 8:45 AM, Professor Buchanan starts to set up his classroom. He'll be lecturing today, so he aligns the RHOMBII tables to face the front of the classroom and plugs each row into a single wall outlet. The built-in power module on each table's work surface makes it easy for students to take notes on their laptops. By 9:00 AM, Professor Buchanan is all set up at the RHOMBII lectern, and his students at the tables, eager to learn.

RHOMBII Lectern

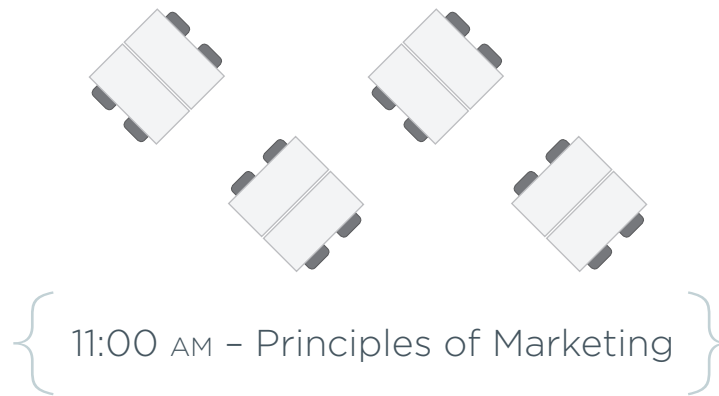

Built-in Power Module

Technology Support

*Designed to support evolving technology,
RHOMBII helps increase productivity for
both faculty and students in any learning environment.*

Ready. Set. Collaborate.

At 10:50 AM, Megan Lutz takes over the space. She organizes the RHOMBII tables into small meeting stations so the students can work on their group projects. Designed to flip and nest, moving RHOMBII is a simple, one-person job. The entire room changes in a matter of minutes to support the intention for the space. Collaboration is at the core of today's activity, so the RHOMBII adjusts to maximize results.

2.5" Casters with Brakes or Glides

Concealable Power Module

Full-width Modesty Panels

*RHOMBII was designed to
enhance communication
so visions and ideas can be brought to life.*

Flip It. Nest It. Be Productive.

The students in Industrial Design have been developing packaging solutions. They've reconfigured the room to better support today's to-do's: student presentations followed by group discussion. With unlocking casters, it's easy to move the room around. The RHOMBII top also flips up with power and data folded neatly inside the modesty panel, so the unused tables nest tightly together. In this arrangement, both demonstration and dialogue are supported within a single configuration.

Folded Modesty Panel

Tables Nesting

Table Legs Nested

*With a table that adjusts to the needs of any space,
RHOMBII allows you to transform one room
into the work space you think up, time and time again.*

{ 6:00 PM – Quarterly Department Meeting }

Unfold. Gang. Discuss.

As the sun goes down, the Anthropology Department kicks off their quarterly planning session. Faculty members push the RHOMBII tables together to support their conversation and to increase the amount of available work space. Because RHOMBII tables easily daisy chain together, each individual table has access to power and data from a single wall outlet. Kim Johnson powers up the agenda from her laptop as the wheels for the third quarter are set in motion.

Cord Management

Work Surface

Ganging Tabletops

*The need for supportive, flexible power and data
was built into every inch of RHOMBII.*

RHOMBII

Versatile Design for the Modern Collaborative Environment

The RHOMBII training table is the cornerstone of the modern environment. Be it for a work or learning space, RHOMBII was built to adapt. Designed to support flexibility. Developed to encourage collaboration. With clean, crisp lines and finishes that look good from all angles, RHOMBII's configuration possibilities are limited only by your imagination.

A Complete Line

At Bretford, our products work together to create complete environments that improve how people work and learn. Our RHOMBII line is comprised of training tables with adaptable power, as well as a lectern. Bretford also has carts, mobile boards, and easels that can be coordinated to match.
