

Wireless UHF Microphones

Califone wireless mics are compatible with our UHF PAs (PA919SD, PA919, PA919-PS, PA419, PA319). Choose from a handheld mic or the beltpack transmitter to use with any of our five hands-free mics.

The upgraded beltpack transmitter features two power levels – one for transmitting audio up to 50' within smaller enclosed rooms and a higher power level for transmitting from 50' to 150'. The lower power frequency will help prevent interference if there are neighboring wireless PA systems being used nearby.

Q319 Dynamic Handheld Wireless Mic \$187
M319 Beltpack Transmitter \$187

Wired Microphones

Handheld Uni-directional Mics

This highly sensitive handheld microphone provides superior sound quality with its professional grade XLR plug, which makes it perfect for student, teacher, or parent presentations. These mics give all your presenters or performers the confidence they need.

PADM-510 (1/4" plug) \$68.50
PADM-515 (XLR plug) \$67

Learn more about the PA Pro

PA Pro™

This portable, battery-powered voice support works in a variety of settings for up to 150 people – conferences and meetings, lecture halls, field trips, tour groups and any indoor/outdoor venue. The beltpack transmitter has a 100' transmission range to the PA and stores inside the amplifier along with its dedicated lapel mic to keep components safe and organized. There is a choice of two VHF frequencies. We offer other PA Pro packages, accessories, and handheld mics.

PA10A 206.950 MHz frequency \$382
PA10B 210.800 MHz frequency \$382
