

 **Store & Charge**
NET 20/30

These all steel trolleys allow for **secure** storage and recharging of up to 20 or 30 netbooks from a single mains socket. The **compact** footprint is ideal where space is limited and the electronic power management system offers peace of mind that the building circuits are **protected**.

- Compact space saving design
- Power management & Auto-Power-Off
- Easy to use, neat and tidy cable management
- Robust all steel construction
- Upgradable/replaceable power module
- Suitable for all current netbook brands/models
- Also suitable for use with tablet devices

Netbook Storage & Recharge Cart

Ideal for storing and charging tablet devices

The Store & Charge range offers exceptional versatility as all carts feature standard switchable plug sockets built into the rear of the trolley, meaning this unit is also suitable for storing & charging tablet devices or even a combination of different devices.

- Compact foot print ideal where space is limited
- Charges all netbooks/devices from a single mains socket
- Power management module to protect building circuits
- Suitable for up to 10.2" netbooks
- Energy saving 'Auto Power Off' feature
- Power pack shelves and Y-leads are provided for tidy storage & ease of use
- Utilises the netbook's own power pack and connecting lead so can be used with multiple brands of netbooks at once
- 4 way power board is provided for use with auxiliary equipment, such as wireless router, printer etc. (Netbook20 only)
- Ergonomically positioned handle to offer enhanced mobility (Netbook30 only)
- All steel construction with key locking front & rear doors provide a significant theft deterrent
- All electrics are securely stored in the rear of the cart to prevent unauthorised tampering
- Heavy duty casters, two locking for added stability
- **12 year guarantee** (1 year on electrics)

Power Management

Fully earthed and features a built-in Electronic Power Management system (EPM) that regulates the amount of current being drawn from the mains supply, preventing the school's circuits being tripped and so minimising classroom disruption. Energy saving "Auto Power Off" feature automatically switches the unit off after a 50 hour charging cycle, ensuring it cannot be inadvertently left on for extensive periods, for example, holidays.

Easy to use, neat and tidy

The Bretford Store & Charge range is quick & easy to set up with power pack shelves in the rear of the cart along with Y- leads, which dispense with the netbook's own 3-pin plug and lead, reducing the amount of excess cable and eliminates cable spaghetti.

Low maintenance

All the electronics are housed in an easily removable power module which in the event of a problem can be simply swapped out, greatly reducing down time and costs.

Electrical Safety/Certification

As with all Bretford charging solutions, these trolleys have been fully tested and CE certified, ensuring the highest levels of electrical/build safety and complying with the latest HSE manufacturing guidelines on electrical safety.

Rear doors provide secure access to the power module, power pack shelves and cables to prevent unauthorised tampering

Power pack shelves and Y-leads provided for tidy storage and ease of use

20 and 30 bay models available

| Code: | Dimensions: | Compartments: | Weight |
|------------------|-----------------------|--|--------|
| Netbook20 | 562W x 562D x 1050mmH | 508W x 334D x 71mmH (10 shelves - 2 netbooks per shelf) | 70kgs |
| Netbook30 | 600W x 600D x 1408mmH | 425W x 350D x 57mmH (10 shelves - 2 netbooks per shelf) | 112kgs |
