

LED SNOWFALL LIGHTS

- Create the look of falling snow with random chase LED light strings that are designed to dangle from the tree branches or other areas
- Small lens LEDs arrayed in a ladder like pattern create snowflake pinpoints for a more realistic look
- A unique new look for seasonal decor employs low energy (less than 5 watts per string) and long lasting LEDs
- Snowfall strings have between 64 and 256 LEDs per string for an eye-catching look!
- Lengths from 0.5 meters to 3 meters in half meter increments
- Available in Ultra Warm White and Pure White
- Easy to install - create a dynamic effect with just a few strings!

Snowfall sequence timing varies by length. Use multiple lengths arranged in a random fashion for best snowfall effect lighting.

In order to provide even coverage, and to distribute snowfall drops around the tree, use 12', 20' and 50' length spacers in conjunction with harnesses and appropriate power supply (see illustration).

Harnesses can interconnect; spacers are compatible with snowfall lights, harnesses, power supplies and each other.
