

iPad® Listening Center / Jackbox

Maximize mobile technology and ramp up student engagement in your class. Our iPad Jackbox allows you to create independent groups of up to six students focused on a single activity. It works with any iOS-based smartphone or tablet and connects with Android® devices with its included Y-cord. The 30-pin female connection acts as a docking station for iPhone® (up to 4S), iPad® (up to 3), and iPod® (up to 3). It features our hallmark rugged ABS plastic casing for durability and safety.

1206i-06 (with six 3068AV headphones) \$235.00

1206i (headphone not included) \$128.00

Megaphones

Whether on the athletic field, for tour groups, or in emergency response situations, the importance of a clearly heard message can be critical! Together they deliver new technology in two megaphone firsts with new ways to connect and transmit external audio for playback. The PA25RBT offers Bluetooth® connectivity from any mobile device and the PA25RX has a 3.5mm aux input to connect another wired audio source. With 1,250' ranges, both will broadcast your message or a siren sound so that the entire crowd can hear your information. The 25Watt megaphones each have detachable mics and can record 10-second messages for playback at the push of a button.

PA25RBT \$165.00

PA25RX \$148.00

Two-way, 10 position Jackbox

The 1210T model is the first 2-way jackbox where students (wearing a Califone To Go™ headset with its single 3.5mm stereo plug) can listen to *and* verbally reply. Responses go from the connected headsets through the jackbox and to the attached smartphone, tablet, computer or laptop. The 1210T is ideal for different kinds of literacy and language acquisition activities. In order to master a language, students need to be able to clearly hear and practice pronunciation. This configuration also supports other essential components of the Common Core ELA standards such as group presentations of collaborative projects. It can be used for Skype sessions, Google+ hangouts, FaceTime and other mobile learning applications. The 1210T has a permanently attached 3' cord with ten 3.5mm jacks that are optimized for use with To Go headsets.

1210T \$48.50
