

Individual Headphone Storage Pack

Minimize health risks by assigning each student their own lightweight stereo headphone. Each headphone is stored in its own moisture-resistant storage bag and can be labeled with the student's name for easy identification. These flexible headphones are ideal for extended use.

Hush Buddy™

As ongoing research demonstrates the importance of early childhood education and the growing skills gap between students who have access to quality PreK programs and those that do not, many districts are either considering or adding PreK programs to their schools. For these young students who need the highest level of sound protection, our Hush Buddy ear muffs come in three engaging animal motifs. These are the industry's quietest earcups (27dB), and are ideal for school and home use and also for those students who have difficulty remaining focused on tasks.

HS-BE Bear \$26

HS-PA Panda \$26

HS-TI Tiger \$26

Help students understand that loud noise can damage their hearing. Use these protective earmuffs and earplugs to safeguard students, staff, and faculty against hearing loss. These earcups are designed to completely cover the ears for maximum protection. Schools and districts consistently choose Califone headphones and earplugs as their proven safety choice.
