

Static Storage & Recharging Cabinets

These cabinets enable you to store and recharge laptops or other chargeable devices from a secure central location. Also ideal for offering students, staff or patrons a secure place to store and charge their own laptops or other devices whilst going about their day to day activities.

- Robust all steel construction
- Compact & space saving footprint
- Multiple & single door options
- Choice of locking mechanism & colour options
- 5, 10 & 15 compartment models available

Static Storage & Recharge Cabinets

IT Guardian cabinets can also be supplied with a single, full length locking door, allowing easy access to a full set of charged equipment by opening just one door. Ideal for use in education, providing convenient storage, recharging and easy access to a full classroom set of equipment.

- Each compartment features a built-in switchable mains socket
- Easy to use - Plug in and charge function
- Multiple or single door options available
- Choose the locking mechanism to suit your needs, from a simple key lock, padlock, coin-slot lock, code lock or a sophisticated card locking system that can be integrated into most access control/e-purse systems
- Supplied with mains lead – simply plug into a standard 13amp socket
- Charges all devices from a single mains socket
- Robust heavy gauge all-steel construction provides a significant theft deterrent
- For added security, a steel bar can be added that locks down the front of the doors
- Banks of lockers can be linked together for increased stability
- Standard finish grey frame with a choice of red, blue, green, black door colour options
- Electrical safety is assured as each compartment is fully earthed
- **12 Year Guarantee**
(1 year on electric & locking mechanisms)
