

PIPE AND DRAPE RUNOFFS

This universal portable Pipe & Drape Runoff (PDR) system can extend the theatre-like appearance of a Cinefold, Truss-Style Cinefold or Ultimate Folding Screen Dress Kit on either side of your screen. This free-standing modular system can be assembled in minutes to virtually any size or configuration—without tools. Also suitable as a room divider or to mask unsightly areas.

Drape panels are available in 13' or 50" widths, to be reduced for fullness. Height of 12' or 16', with hems top and bottom to accept horizontal drape supports. All fabrics are flame retardant.

FABRICS

- **Velour**—100% cotton. Black or rich navy. Additional custom colors are available. Details available on request.
- **Inherently Flame Retardant (IFR) Velour**—**NEW!** IFR Velour is washable, and requires no retreating—it is fire-retardant for the life of the material. 15% lighter than standard Velour.
- **Vellite**—Lightweight brushed polyester. Black or rich navy.
- **Classic Twill**—Lightweight polyester with special weave to reduce wrinkling and subdue luster. Black or rich navy. Additional custom colors are available.
- **Poly-Knit**—Lightweight smooth polyester. Black or rich navy.

COMPONENTS

Horizontal Drape Support—Infinitely adjustable, with preset positive locking stops—10' length, with stops at 6', 8' and 10'; 12' length, with stops at 7', 10' and 12'. Attaches to uprights with sturdy steel hook and slot.

3-Piece Upright—**NEW!** Extends from 7' to 17' to quickly and easily adjust your drapery to the height you want with minimal effort. Uses the same tough construction as other Draper uprights.

Slip-Lok Upright—Telescoping uprights are infinitely adjustable from minimum to maximum height settings. Friction lock bears virtually any weight, yet has fingertip release.

STEEL BASES

Sturdy and inconspicuous. Alternate stud positions allow for setup against a wall or in a corner. $\frac{3}{8}$ " x 18" x 18" (35 lbs.), or choose a lightweight base, $\frac{3}{16}$ " x 18" x 18" (18 lbs.).

PIPER

Draper's Piper is a high-quality portable screen that's easy to carry and afford, and it's a breeze to set up. All you have to do is lift the upright, choose its height and raise the screen.

While others manufacture portable screens with damage-prone Mylar, Draper's high-quality, low-cost Piper has a tear-proof Matt White viewing surface, black borders and 30" of black "rise" below the image area.

During storage and transportation, the telescoping upright collapses and clamps to the back of the matt black extruded aluminum case.

SIZES AND FORMATS

NTSC Format from 60" to 84" diagonal

HDTV Format from 55" to 77" diagonal

Custom sizes available by quotation.
