

Project-based Learning Tools

As students take more responsibility for their own learning with student-generated projects, these tools can be easily incorporated into inquiry-based learning that supports the Common Core. Tools designed for little hands are developmentally appropriate for your youngest students.

Wireless Tablet Interface

Wireless tools allow teachers to move around the classroom. This wireless tablet interface allows up to 50' between the USB port and the device. Ideal for use with connected projectors, our portable and lightweight solution offers all of the conventional controls you would expect. Windows® only.

WT1 \$196

Multipurpose Laser Presenter

Use this cool tool when you are using interactive whiteboards or projectors. In addition to performing all the traditional laser pointer functions, it can also open your email program, an Internet browser on your computer, and even right- or left-click your mouse.

LP3 \$85

Interactive Whiteboard

Califone innovative engineering allows schools to deploy this proven technology very cost effectively. By using a 48' x 64" section of the wall itself, unique line-of-sight sensors in the easy-to-assemble frame create the rim of the board that connects to the computer in the exact same way as a more expensive board. Simple Windows-based software quickly calibrates the sensors and the whiteboard is ready to go!

WB80 \$1,170

7-Port Digital Hub

Transfer your digital files; up to 7 devices at a time. Windows and Mac compatible. USB 2.0 and 1.1 compatible.

1117 \$39
