

Mobile Technology Supports Students' Acquisition of Speaking & Listening Skills

To Go™ Headsets enable schools and districts to extend proven audio technology to the increasing number of mobile devices whether they are provided by the school or devices brought from home. Mobile technology offers significant cost advantages over desktop computers. Hundreds of thousands of tablets are flooding into schools this year as educators incorporate more technology into their teaching as required by the Common Core, and cloud-based technology allows schools to cost effectively upgrade their bandwidth to the high density required for curriculum integration and secure online testing.

These headsets are compatible with iPad®, iPhone®, iPod®, Chromebooks®, Android phones and tablets, as well as Kindle® and Nook® and other eReaders. 1:1 device initiatives are driving disruptive shifts in content delivery at the same time most of the country is transitioning to the Common Core Standards. These Califone headsets are the first to meet the specific speaking, listening, and language development ELA standards.

As with all Califone headsets, rugged and durable materials stand up to the rigors of active classrooms and many headsets now offer a two-year warranty. Also, there is an optional To Go™ plug available for the **Titanium™** (HPK-1010T), **Lightweight Stereo** (3065AVT), **Deluxe Multimedia** (3066AVT), **Discovery™** (DS-8VT), **4100** (4100AVT), and the **Listening First™** headsets.

Deluxe Multimedia Stereo Headset

There are two hallmarks of Califone headsets. The first is that they deliver high fidelity audio that also meets OSHA & the American Speech-Language-Hearing Association guidelines for hearing safety. The second is that Califone headsets are designed for rugged use by multiple students over multiple years. This particular headset is ideal for online learning, multimedia lab, or classroom uses. The noise-reducing earcups and boom microphone with individual volume control give students a comfortable and customized sound experience. This is particularly important for sustained practice supporting ELA standards.

Choose between single To Go™, dual 3.5mm or USB plugs

3066USB-10 Ten-pack of 3066-USB w/storage case \$613

3066AV-10 Ten-pack of 3066AV w/storage case \$550

3066AVT-10L Ten-pack of 3066AVT w/o storage case \$470.50

3066AV-10L Ten-pack of 3066AV w/o storage case \$470.50

3066-USB USB plug \$61
