

## 15" PERSONAL VIEWING SCREEN - AXS15HDB

The new 15" Widescreen HDTV LED Personal Viewing Screen is the perfect solution to upgrade your club with digital broadcast-ready personal screen entertainment. The AXS15HDB is available in matte black and securely attaches to existing cardio equipment LCD mounts, telescopic stand or custom mounts provided by Broadcastvision. Universal VESA mounting availability. Users simply plug their headphones into the AXS17TVCX2 controller and select their preferred available TV program.

## PERSONAL VIEWING SCREEN CONTROL OPTIONS

- CAB (CONSOLE ADAPTER BOX) - AXSCAB-01
- UNIVERSAL CONTROLLER - AXS17TVCX2

The BVE 15" Personal Viewing Screen (PVS) can be controlled using an attached controller or through the console of the top brands of cardio equipment using the CAB. The CAB is attached to the back of the screen allowing the user channel and volume control using the TV controls already integrated into the console of the cardio equipment. For applications where the cardio console has no TV buttons, a robust AXS-series controller easily attaches to the cardio equipment for users to simply plug their headphones in and select their preferred TV programming. Both the AXS17TVCX2 and the AXSCAB-01 will also allow the user to operate Cable/Satellite set top boxes in conjunction with any manufacturer's personal viewing screens, eliminating the need for a burdensome handheld cable/satellite remote control unit and savings thousands of dollars compared to a channel-limiting head-end system.

### CARDIO EQUIPMENT TV MOUNTS

Compatible with Manufacturer's mounts and consoles.

### CAB (CONSOLE ADAPTER BOX)

Control TVs & Cable/Satellite boxes without an attached controller or a handheld remote.

### AXS17TVCX2

#### (UNIVERSAL SCREEN CONTROLLER)

Compatible with Cable/Satellite boxes, works with other Manufacturer's Personal Viewing Screens.
