Da-Lite designs and manufactures the most comprehensive line of large projection screens available in the world.

Any Size.

Da-Lite redefines the projection screen market with the introduction of new, large scale projection screens designed to handle the biggest installations. With seamless heights up to 16 feet, new electric screens measuring over 39 feet wide, and lace and grommet screens measuring over 120 feet long, there's virtually no screen size too large when you specify Da-Lite.

Any Shape.

What you can imagine we can produce. When your next project calls for the projection screen to be the star, you can rely on Da-Lite for the solution. Whether the demand is for a special shape and size for corporate presentations, award ceremonies, political conventions, game shows or rock concerts, Da-Lite has the experience to deliver your dream.

Any Time.

We never met a delivery schedule we didn't like. All Da-Lite projection screens are manufactured to the customer's specifications, so building a large scale custom screen is a daily practice at Da-Lite. No more delays or excuses when its time to deliver. Our state-of-the-art facility is located in the central part of the U.S. making shipping to either coast or internationally a snap.

Any Where.

From concerts in Dubai to game shows in Hollywood to the symphony halls of Europe, you will find Da-Lite projection screens delivering big performances. The larger the audience and the bigger the screen, the more the worldwide presentation market comes to Da-Lite for large scale projection screens.

Electric screens

We understand that construction considerations impact large scale screen installations even more than normal size screens. You can count on Da-Lite to get it to you on time, every time. It's a "big" Da-Lite Difference.

Electric Screens That Redefine the Category.

Bigger is better. Large scale electric projection screens from Da-Lite are designed to increase functionality and flexibility for today's presentation environments. Crafted to strict Da-Lite standards, these innovative screens are now available in widths exceeding 39 feet. Da-Lite electric screens also feature seamless heights up to 16 feet for picture perfect reproduction in the most challenging environments.

With a choice of fabrics and finishes, every projection screen is built to the project's specifications. No more guessing. No more compromises. Just incredible screens that offer tremendous picture quality. Perfect for large venues like auditoriums, hotel conference center installations or for adding flexibility to worship facilities, large scale electric screens from Da-Lite are the choice of leading architects and AV consultants around the globe.

Custom screens

Turning imagination into reality, everyday.

For over 100 years, we have been designing and building custom projection screens in shapes and sizes that challenge our designers to use all of their tremendous skills. Now, we've dedicated this experience and talent to the Da-Lite Design Center, an online go-to resource providing the support that turns your ideas into something special.

Every custom screen is individually engineered and features a Da-Lite projection screen material designed to optimize the viewing experience. Visit the Da-Lite Design Center at da-lite.com/designcenter and check out the "Gallery." Put your imagination to work and we'll put our team to work for you.

The really big screens
for the really big shows.

Da-Lite fixed frame value means big audiences get big screens without having to compromise the experience. The result is a viewing environment that delivers on the director's and producer's creative vision. A result so immersive, it must be experienced. A result that can only be achieved using large scale fixed frame screens from Da-Lite.

Da-Lite engineers every lace and grommet and fixed frame screen to withstand the rigors of taking the show on the road. Our easy up - easy down frame design means that the curtain always goes up on time.

Whether "fixed" or "flown" using front or rear projection, Da-Lite's tough tubular frames and performance enhancing screen surfaces add a new dimension to live events. When the performance demands not only the biggest, but the best; think big, think Da-Lite.

[Fixed Frame screens

Fast Fold screens

The next big thing for meetings and conventions.

Da-Lite brings value to each and every large scale projection screen it builds. Every screen is engineered for easy installation and offers a selection of proprietary screen surfaces designed to match the viewing environment. Da-Lite's rental and staging Heavy Duty Fast-Fold® Deluxe folding frame screens are perfect partners for large presentations and big audiences.

Available in any format in front or rear configurations, the Fast Fold® system and family of accessories puts your best foot forward when it's time to present to critical shareholders or curious convention goers. For multi projector, edge blending presentations, specify Da-Lite's proprietary Ultra Wide Angle screen surface – you get the picture!
