

## CAB (CONSOLE ADAPTER BOX) — AXSCAB-01

Use existing integrated controls on cardio equipment when installing Broadcastvision 15" and 17" Personal Viewing Screens (or any other brand PVS) and/or to eliminate handheld remote controls provided by Cable/Satellite providers.

The CAB (console adapter box) connects to the back of the PVS to adapt screens for on-console button control. The CAB will also adapt console or attachable controllers to operate ANY cable/satellite set top box. This eliminates handheld remote controls required by cable/satellite providers and provides more flexibility at less cost compared to expensive head-end modulating gear.

The CAB is small (3"x1.5"x.74"), compatible with the most popular cardio equipment brands and cable/satellite providers, and can be expanded for your application: LIFE FITNESS®, PRECOR/CARDIO THEATER®, MATRIX®, STARTRAC®, CYBEX®, Comcast®, TimeWarner®, DISH®, DirecTV®, Motorola®, AT&T Uverse®, Verizon Vios®, IPTV®, Haivision®, Cablevision® and others.

To order: Contact us with these 3 pieces of information:

1. Cardio equipment console brand and model
2. PVS brand and model
3. Cable or Satellite set-top box brand and model (if applicable)

## CAB (CONSOLE ADAPTER BOX) REFERENCE GUIDE

Dimensions: 3"x1.5"x.74"
