

The PI39 and PI30-PS have fixed and variable volume outputs, so additional wired speakers or a supplemental configuration such as a dedicated assistive listening system for special needs students can be connected.

PI30-PS

Enjoy the same signal-to-noise enhancing qualities as the PI39 but without the UHF capability. This powered speaker has both fixed and variable line-ins and line-outs, mic and DC functioning. **PI30-PS** \$228.50

Read how Dysart USD, AZ uses the PI39 with over 450 projection systems throughout their district

PI39

Our wireless Array Speaker offers classrooms and computer labs the greatest flexibility in deciding how or where to enhance audio with the advantage of 16-channel UHF wireless reception. **PI39** \$356

iPod Wireless Portable PA System

This terrific addition to the Califone family of PA products includes the first Apple®-approved docking station available for schools. Now you can stream music and other audio files from your iPhone or iPod or listen to previously recorded audio from the DVD/CD player. Whether you use it indoors or out, its robust sound easily carries in rooms up to 2,000 square feet or in a gathering of up to 300 people. It can also be hooked up to a computer and a projector for multimedia broadcasts to support individual or group presentations on campus or off.

In addition to accommodating two presenters with wireless mics, the PA-419 has an input for a wired mic allowing a third presenter to participate, making this ideal for school wide presentations. It also features voice priority capability so the music will stop while announcements are made with either the wired or wireless mics. Once the announcements are concluded, the music will automatically return to the same level as before.

The PA419 runs on AC power or its rechargeable battery, plays for at least 2 hours on a single charge and even fully functions when it's recharging. Since presenters and teachers prefer the flexibility to move around during lectures, the PA419 comes with a remote control that includes pitch adjustment for audio played from the DVD/CD player, making it ideal for dance and music teachers.

The PA419 is available with one or two wireless mics, one hands-free mic with a wireless transmitter, or individually.

- PA419Q2** with two Q319 wireless mics \$1,544.50
- PA419M** with M319 beltpack transmitter & HBM319 mic \$1,357
- PA419Q** with one Q319 wireless mic \$1,394.50
- PA419WS** with WS-CK1 (page 25) \$1,429
- PA419** \$1,246
