ICON KEY

Icons are used throughout the catalog to help you quickly identify key product with high level of performance.

High Acoustics

Acoustical options available.

Product has NRC (Noise Reduction Coefficient) 0.70 or greater.

Fire Performance Class A

High Durability

Washability

Offers superior wash resistance without compromising panel finish integrity, using a washability tester as per ASTM D4828.

Scrubability

Product is scrubable. See specific info on product page.

Impact Resistance

Excellent resistance to surface impact as per Falling Ball Test.

Scratch Resistance

Excellent resistance to surface scratching, scuffing, or chipping as per Hess Rake Test.

Soil Resistance

Excellent resistance to dirt and/or grease for lasting value and performance.

Color Availability

Available in color.

Recycle Program

Product is recyclable through the Armstrong Recycling Program

METAL WALLS

Custom Metal Walls pgs. 315-316

Metal

Sample of color selection shown.
Custom and RAL colors available.

FABRIC WALLS

Custom Fabrics & Sizes – You Select It, We'll Make It!

Soundsoak® Custom pg. 312

Choose a standard fabric or select your own.
We'll create your walls.

Contact Architectural Specialties at 1 877 ARMSTRONG, and select options 1-1-4 for assistance with your Custom Walls project.

Soundsoak® Wall System 24" x 72" panels in FR-701 Eucalyptus fabric

FR-701 (FR)

Fabrics are dye-lotted and should be segregated by dye lot. Do not mix.

KEY SELECTION ATTRIBUTES

- Available in two substrates, a variety of fabric and vinyl colors, in a wide range of sizes
- Acoustical inner core absorbs 50-90% of sound striking surface
- 3 to 6 times the sound absorption of fabric-covered gypsum
- Easy to install over existing walls
- Wide variety of chair rail accessories for design and durability
- Coordinate finishes Soundsoak Baffles (pgs. 63-64); and Diffusers (pg. 313)
- Full finish offering at armstrong.com/soundsoak
 - Rhythms, Tempos, Signature, and Classic

EXAMPLES:

PHYSICAL DATA

Fire Performance

Factory Mutual Approvals certificate; (Corner Burn Test meets UBC Standard 8-2 and NFPA 265, fully lined protocol) MEA # 162-87-M
Tested to ASTM E84 – 25/200
Tested to CAN/ULC S102*** – 25/250
Composite Class A rating per IBC (fabric, substrate, and adhesive)

For more details on Soundsoak fire performance, visit our web site at armstrong.com/soundsoak

The ASTM E84 or CAN/ULC S102 standard should be used to measure and describe the properties of materials, products, or assemblies in response to heat and flame under controlled laboratory conditions and should not be used to describe or appraise the fire hazard or fire risk of materials, products, or assemblies under actual fire conditions. However, results of this test may be used as elements of a fire risk assessment, which takes into

account all of the factors, which are pertinent to an assessment of the fire hazard of a particular end use. Values are reported to the nearest 5 rating.

Wall Construction†

3-5/8" metal studs with one layer of 5/8" drywall on both sides and Soundsoak 60 on one or both sides.

Use our online Custom Walls Selection Form at armstrong.com/customsoundsoak, and we will create walls to your specifications.

Custom Soundsoak® Walls in Guilford Block Party Canyon fabric with Half Bevel edge detail

Custom Soundsoak Wall System in Custom Carnegie Strie fabric with Kerf edge detail

KEY SELECTION ATTRIBUTES

- Variety of capabilities in fabric, vinyl, painted and drywall look finishes.
- Custom fiberglass panels up to 48" wide and 144" high or 60" wide and 120" high on 1/2" – 4" fiberglass
- Tackable options including 5/8" thick mineral fiber panels that will sit flush with door frames – perfect for offices and corporate environments.
- Variety of impact resistant panels available for high traffic and high abuse areas.
- Convex and concave curved panels in up to 48" x 144" sizes.

EDGE DETAILS

Fabric-wrapped edge profile options on custom panels include: square, beveled, mitered and radiused edges.

FLEXIBLE INSTALLATION

- Impaling Clips
- Z-clips
- Adhesive

Impaling Clip

PHYSICAL DATA

Material
FSC-certified fire retardant particle board with face-cut veneers (SW-COC-003601). For more information about FSC-certified products or to view our FSC certification letter, visit armstrong.com/woodworksfsc

Surface Finish
Clear or tinted semigloss coating

Fire Performance
ASTM E84 surface burning characteristics, HPVA Certified with audit program per ASTM E84. Flame Spread Index 25 or less. Smoke Developed Index 50 or less.

CAN/ULC S102 surface burning characteristics. Flame Spread Rating 25 or less. Smoke Developed Classification 50 or less.

Application Considerations
Variation among panels may occur due to the natural characteristics of the wood and grain (special order panels available).

It is very important that WoodWorks panels are climatized prior to installation. Relative humidity between 25% and 55% and temperatures between 50°F and 86°F must be maintained throughout the life of the product.

Design Considerations
The reveal width on WoodWorks Tegular panels and WoodWorks Walls is different. For an application with the same size reveal in the ceiling and on the wall, order custom cut panels or use Tegular ceiling panels Z-clipped to the wall.

Specification Consideration
Attention: For FSC-certified wood products to maintain their CoC certification, products must be sold to a CoC-certified distributor or directly to the installing contractor. Failure to do so breaks the CoC.

Warranty
Warranty details at armstrong.com/warranty

[†] NRC 0.70 or 0.90 when installed with 1" fiberglass backer
 NOTE: For sizes available as special order, call Architectural Specialties at 1 877 ARMSTRONG and select options 1-1-4.

ACCESSORIES

For corners, clips, and infill panel options, see page 325.

COLORS AND PERFORATIONS

Natural Variations

- NV Maple (NMP) W7 (13mm profile with 3mm groove)
- NV Light Cherry (NLC) W8 (5mm profile with 3mm groove)
- NV Dark Cherry (NDC) W9 (25mm profile with 3mm groove)

Images Finishes

- Images Maple (PMP) W7 (13mm profile with 3mm groove)
- Images Light Cherry (PLC) W8 (5mm profile with 3mm groove)
- Images Dark Cherry (PDC) W9 (25mm profile with 3mm groove)

PHYSICAL DATA – Natural Variations

Material

FSC-certified fire retardant medium density fiberboard with face-cut veneers (SW-COC-003601). For more information about FSC-certified products or to view our FSC certification letter, visit armstrong.com/woodworksfscc

Surface Finish

Clear or tinted semigloss coating

Fire Performance

ASTM E84 surface burning characteristics. Flame Spread Index 25 or less. Smoke Developed Index 50 or less.

CAN/ULC S102 surface burning characteristics. Flame Spread Rating 25 or less. Smoke Developed Classification 50 or less.

Application Considerations

Variation among panels may occur due to the natural characteristics of the wood and grain.

It is very important that WoodWorks panels are climatized prior to installation. Relative humidity between 25% and 55% and temperatures between 50°F and 86°F must be maintained throughout the life of the product.

Specification Consideration

Attention: For FSC-certified wood products to maintain their CoC certification, products must be sold to a CoC-certified distributor or directly to the installing contractor. Failure to do so breaks the CoC.

Warranty

Warranty details at armstrong.com/warranty

Weight; Square Feet

2.2 lbs/SF (Bulk packaged)

PHYSICAL DATA – Images Finishes

Material

Fire retardant medium density fiberboard with high quality printed visual.

Surface Finish

Clear semigloss coating

Fire Performance

ASTM E84 surface burning characteristics. Flame Spread Index 25 or less. Smoke Developed Index 50 or less.

ASTM E1264 Classification

Composite – Fire Class A

Application Considerations

Images finishes feature a high definition print finish. A pattern repeat will occur approximately every 30".

It is very important that WoodWorks panels are climatized prior to installation. Relative humidity between 25% and 55%, and temperatures between 50°F and 86°F must be maintained throughout the life of the product.

WOODWORKS™ Ekos® Standard Wall Panels

67% RECYCLED CONTENT

LEED®

Calculate LEED contribution at armstrong.com/greengenie

*LOCATION DEPENDENT

WoodWorks Ekos Acoustical Wall System in Ekos Dark Cherry perforated with reveal accent trim in Natural Aluminum

KEY SELECTION ATTRIBUTES

- Panels can be installed horizontally or vertically
- No detectable VOC emissions
- Can help contribute to LEED credits with no-added formaldehyde and high recycled content
- Less expensive and easier to install than custom millwork

VENEER SELECTION

Due to printing limitations, shade may vary from actual product.

PERFORATION OPTIONS Actual 1:1 scale shown.

* When specifying or ordering, please include pieces/carton and color suffix. EXAMPLE: 5805 4 H G – Four nominal 10' perforated panels in Ekos Mahogany finish.

ACCESSORIES

For installation splines, corners, chair rails, etc., see page 326.

PHYSICAL DATA

Panel Material

Mineral fiber with real wood veneers. Face veneers are quarter-cut, random-matched Anigre or Makore veneers stained to the Ekos finishes.

Panel Surface Finish

Tinted, no-solvent coatings on face veneers.

Accessory Material

Milled solid wood stained to coordinate with Ekos finishes. Extruded aluminum.

Wall Construction

Wall construction is one layer 5/8" drywall each side of 3-5/8" metal stud, with Ekos panels attached on one or both sides.

Fire Performance

Class B fire performance per IBC. Flame Spread Rating of 50 or less and Smoke Developed Classification of 100 or less when tested per ASTM E84 or CAN/ULC S102.

Application Considerations

Due to the natural characteristics of veneers, variations in color and grain can be expected. Do not mix panels from different lots. Veneered panels may also darken over time.

It is very important that WoodWorks Ekos panels are climatized prior to installation. Relative humidity between 25% and 55% and temperatures between 50°F and 86°F must be maintained.

Ekos wall panels are not recommended for use in high-traffic or high-impact areas. For these areas, contact Architectural Specialties at 1 877 ARMSTRONG and select options 1-1-4 to explore WoodWorks Custom wall systems.

Ekos wall panels may be installed horizontally. For more details, see armstrong.com/walls.

Infusions Partition in Spun Copper

KEY SELECTION ATTRIBUTES

- Coordinate with Armstrong or other interior finishes including Infusions Walls, Lay-in panels, and canopies, SoundScapes® Shapes and Blades, or Create! ceilings.
- Standard products create a custom look
- Hang individually or in groups
- Panels and installation hardware packaged in one complete kit
- For Infusions panels and sheets, see pages 139-142. For Infusions Canopies, see pages 37-38. For Infusions Wings, see page 40. For Infusions Walls, see pages 323-324.

For more information, visit armstrong.com/infusions.

In addition to these standard options, panels are available in other colors. Contact the Armstrong Architectural Specialties project management team for details at 1 877 ARMSTRONG and select options 1-1-4.

COLOR SELECTION Due to printing limitations, shade may vary from actual product.

Fire Performance

Infusions panels have been tested according to NFPA 286 and are equivalent to Class A Interior Finish as defined by the International Building Code.
Contact TechLine at 1 877 ARMSTRONG for specific US and Canadian fire performance data.

Installation and Design Considerations

Do not allow panel edges to get wet.
Infusions panels are not approved for exterior application.
Panel kits include ceiling hanging kit and floor mounting kit hardware. Floor mounting hardware is optional, but recommended. Floor mounting hardware requires field drilling pilot holes in panels.
Linking kits must be ordered separately.
Panels can be damaged by exposure to high temperatures.
Panel temperature should not be permitted to exceed 100°F.
