

Weldolet® Welding Fitting Bursting Test Comparison

“Shape of Reinforcement” has been pioneered by BONNEY FORGE for the past 60 years. The fact that shape is even more important than area replacement for branch reinforcement has gained wide industry recognition. Even though the Weldolet® does have sufficient area replacement, the factor setting it apart from conventional lap type reinforcement is its SHAPE . . . reinforcement close to the juncture - completely bonded homogeneous reinforcement avoiding cracks, fillet welds, and re-entrant corners - reinforcement tapering at the sides to prevent abrupt change in thickness where fitting joins header pipe.

Specify and use the Weldolet® for all your full size and reducing branch connections. It is available in carbon steel and all alloys for any piping service.
