FLINTLASTIC[®] SA

Self-Adhering SBS Modified Bitumen Roof System

CertainTeed
SAINT-GOBAIN

Goes down fast. Stays on strong. Flintlastic® SA performs in all the right ways.

What's most important to you? Speed of installation? Durability? Appearance?

Flintlastic SA self-adhering SBS modified bitumen low slope roofing system is a premium performer in all of these areas.

What is the SA system?

Flintlastic SA is a self-adhering SBS modified bitumen system. With high-quality materials, bottom to top, components of the system include:

- Flintlastic SA NailBase (mechanically attached)
- Flintlastic SA PlyBase (self-adhering)
- Flintlastic SA Mid Ply (self-adhering)
- Flintlastic SA Cap (self-adhering)
- Flintlastic SA Cap FR (fire-rated, self-adhering)
- FlintPrime SA (primer)

What are the advantages?

No torches, no hot asphalt, no fumes and no mess – all of which means application is much cleaner and much faster. Plus, equipment needs are minimal. These advantages are even more amazing considering the long system life you can expect.

Where can I use it?

These products are flexible and can be used on commercial and residential roofs in three-ply or two-ply applications, depending on the roof's requirements. Large jobs or small, use Flintlastic SA anywhere you want a low slope roof that will last.

What about colors?

Now you can color coordinate a low slope roof to an adjacent shingle roof. Flintlastic SA is available in colors to complement the most popular CertainTeed shingles.

*Does not contain red granules.

Burnt Sienna

Colonial Slate*

Moiré Black

Heather Blend

Resawn Shake
