## 25-Year Linear Performance Warranty

SolarWorld guarantees that the actual output of the product will amount to at least 97% of effective output during the first year of operation of the product and as of the second year of the operation of the product, the effective output will decline annually by no more than 0.7% for a period of 24 years, so that by the end of the 25th year of operation an actual output of at least 80.2% of effective output will be achieved. In the event of a negative deviation of actual product performance from the so-called threshold values, SolarWorld will either

supply you with replacement products, which make it possible to maintain actual performance, carry out repair measures, which make it possible to achieve actual performance or grant you financial compensation for the reduced performance of the product. During the initial 15 years of the warranty running time, SolarWorld will exclusively either offer to supply replacement products, which will make it possible to maintain actual performance, or to carry out repair measures which make it possible to achieve such actual performance. After the expiry of 15 years of the warranty SolarWorld may freely decide to grant financial compensation for the reduced performance.

## SEE THE WARRANTIES PROVIDED BY THE ORIGINAL EQUIPMENT MANUFACTURER AND/OR THIRD PARTY SUPPLIER FOR FULL DETAILS OF THE COVERAGE FOR THE COMPONENT SPECIFIED IN TABLE 1 AND THE POWER OUTPUT COVERAGE SPECIFIED IN TABLE 2

For PV Kit components purchased through CertainTeed, CertainTeed hereby assigns and passes through to the property owner all manufacturers' warranties to the greatest extent such warranties are assignable.

All other components of the PV Kit, including electrical wire and conduit as specified in the CertainTeed Installation Instructions, are defined collectively in this Limited Warranty as the "CertainTeed Warranted Products" and are warranted by CertainTeed for the period of years designated in Table 1 as Warranty Years for that component from the date of installation. If, during the warranty period, CertainTeed determines that a manufacturing defect exists in any of the CertainTeed Warranted Products, CertainTeed will pay to repair or replace the product, at its option, and at no charge to the property owner. CertainTeed's sole liability to the property owner will be for the repair or replacement of the CertainTeed Warranted Product determined by CertainTeed to be defective. If, during the effective period of this Limited Warranty, CertainTeed, at its sole discretion, determines that the PV Kit cannot be repaired, replaced or that suitable replacement product is not reasonably available, CertainTeed will pay to the property owner compensation calculated as follows:

Ninety percent (90%) of both the original cost to the property owner of the PV Kit and the original cost of installation multiplied by the percentage of warranty months that remain unused of the warranty months for that component, as calculated from the date of installation to the date that CertainTeed determines that a defect exists in the installed CertainTeed Warranted Product. In no event will CertainTeed be responsible for or have any liability for workmanship in the installation of the PV Kit on the property.

## TRANSFERABILITY

This Limited Warranty is transferable by the original property owner and subsequent property owners only during the ten (10) year period after original installation. The warranty transfer is only effective if the new property owner provides written notice of the transfer to CertainTeed within sixty (60) days from the real estate title transfer date. **Notice must be sent to CertainTeed Roofing Technical Services Department, 1400 Union Meeting Road, Blue Bell, PA 19422.**
