some
Armstrong
firsts

Sustainability

- **One of the Founding members of the USGBC**
- First to launch ceiling recycling program
- Since 1999 – over 153 million square feet recycled in North America
- First ceiling company to become an adopter of the AIA 2030 Product Challenge
- WoodWorks® family receives biobased certification from USDA BioPreferred® Products program
- FSC-certified® wood ceilings with no-added formaldehyde and Class A fire rating
- First online LEED® calculator, Green Genie™
- Health and Environmental Product Declarations for most popular ceiling and suspension systems

Innovation

- AirGuard™ Coating actively removes formaldehyde and other aldehydes in indoor air
- **DC FlexZone™ distributes low voltage DC current to electrical devices in ceiling**
- **Integration of technical zone to unclutter the ceiling plane**
- Create!™ ceilings in your choice of custom colors and images
- StrongBack™ pre-engineered support solution for spans over 6 or 7 feet

performance

Tested and Certified

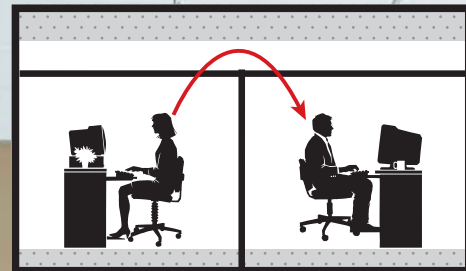

- Balanced acoustics
 - CAC – important for sound blocking between closed spaces and from closed rooms to adjacent spaces
 - NRC – important for reducing sound that bounces around a room
- High recycled content, recycling program
- Industry certified tests for fire, sag, light reflectance, washability, durability, impact, emissions, and more
- Durable panels, ease of handling
- 30-year limited system warranty on ceiling panels and suspension systems

“Let the Buyer Have Faith”

These are the words spoken 150 years ago by Thomas Armstrong, our company founder. He believed then, as we do still, that our customers should expect quality products.

By 1864, he was tucking a written guarantee into burlap sacks of cork shipped from his factory in Pittsburgh, Pennsylvania. Through the centuries, Armstrong has built upon its traditional strengths, diversified and innovated products, and followed a customer-oriented path.

CAC is a rating for performance of a ceiling system as a barrier to sound transmission between closed spaces and from closed rooms to adjacent spaces.

Calla™ Beveled Tegular ceiling panels with Interlude® 9/16" suspension system in Blizzard White
TC Motion, Lancaster, PA
