Easy-to-use
Easy-to-see
Easy-on-the-wallet

The 7300 Thinline Series Icon Keypads offer high-quality, cost-effective security control in a stylish, sleek design.

- Visual and audible alarm notification
- Easy-to-use shortcut key operation
- Optional integrated proximity reader
- Silence alarm while system remains armed
- For use with the XT Series™ Panels

Enhanced Options

7363 keypad proximity reader accepts DMP 1300 Series proximity credentials

THINLINE™ SERIES ICON KEYPADS
7360/7363

FEATURES

- Affordable solution for both residential and small commercial operations
- Attractive Thinline keypad housing
- Display icons provide quick, intuitive, and easy-to-use visual reference for panel operation
- False Alarm features supported
- Extend schedules with the touch of a button
- Keypad and logo backlighting turn Red in alarm conditions
- User-adjustable brightness, tone, and volume controls

- Three two-button panic alarms for panic, emergency and fire
- Optional on-board proximity reader allows users to present proximity credentials to arm or disarm the system
- Simple harness connection to 4-wire keypad bus
- Distinct fire, burglary, zone monitor, and prewarn tones
- Displays system status
- Optional backboxes for conduit or wall-mount applications

SIMPLE TO USE

The easy-to-understand icons, combined with the three-character display, provide visual feedback that enables simple arming, disarming, and other functions.

The User Menu allows you to quickly browse through menu options. Disarming and Arming functions are fast and easy. Any function allowed by the user authority level is simply accessed through the keypad, such as silencing alarms, resetting sensors, or displaying events.

CODELESS ARMING AND DISARMING

The innovative 7363 Thinline Series Icon keypads contain an on-board DMP proximity reader that allows users to simply present their proximity credential to the keypad to arm or disarm the system.

USER-FRIENDLY SHORTCUT KEYS

One-button shortcut keys provide quick, easy access to a variety of common functions. Holding down a keypad button for two seconds until the tone resounds provides confirmation. For example, pressing the Instant Key (INST CMD) during the exit delay countdown instantly arms the system. Users can arm, monitor zones, easy exit, test, reset the system, add users, instant arm and a variety of other functions.

Shortcut Keys

FALSE ALARM FEATURES

Providing end users with a way to reduce false alarms, both Cancel/Verify™ and the False Alarm Question features prompt end users to validate whether an alarm has occurred after entering their code. In a Home/Sleep/Away or All/Perimeter system, the user can manually confirm a valid burglar alarm and an alarm is then sent to the Central Station.

EXTEND A SCHEDULE

When the programmed open period is about to expire, the schedule can be easily extended for an additional one to nine hours by entering your user code or presenting a proximity credential.

TWO-BUTTON PANIC KEYS

The top row of keys can be used as two-button panic keys. The user simply presses and holds two of the keys simultaneously to send either a panic, non-medical emergency, or fire report to the Central Station.

VALUABLE VISUAL ALARM INDICATOR

In a normal state, both the keypad and logo backlighting remain Green. However, during an alarm state, the keypad and logo turn Red. The change in color allows users to instantly recognize an alarm condition.

Red Backlighting

Green Backlighting

USER CONTROL

User options allow for adjusting brightness, speaker tone, and volume. The panel brightness automatically adjusts to maximum for easy viewing when any key is pressed, then resets to the user-specified brightness level.

DISTINCT SOUND PATTERNS

The keypads also provide distinct sound patterns for fire, burglary, zone monitor, and prewarn, giving users an audible alert of the type of event occurring.

KEYPAD SUCCESS FEEDBACK

After correctly changing a system setting using the keypad, the user hears a one-second confirmation beep. If the user makes an error or the operation is unsuccessful, the user hears a four-beep warning tone.

VERSATILE UNSUPERVISED OPERATION

Unsupervised operation allows installation of an unlimited number of keypads using the same device address. Increasing the number of keypads allows maximum system operating flexibility.

RETROFIT ANY EXISTING DMP SYSTEM

Retrofitting is quick and easy. Thinline Series Icon keypads have the same footprint as existing DMP keypads and mount in currently installed backboxes. No special modules are required. A simple panel EPROM upgrade is all that is needed for the Thinline Series Icon keypads to operate. Create a new look and provide greater functionality for an existing system at just a fraction of the cost of all new equipment.

MULTIPLE-KEYPAD SAVINGS

Install multiple keypads on the same wire run. Compatibility and cost savings make the Thinline Series Icon an asset in every installation.

PRIVATE LABELING

DMP offers dealers the option to present their company logo on the keypad's rubber logo insert, replacing the DMP logo. The backlighted logo glows Green during normal operation and turns Red in an alarm state.
