Asahi/America Welding Equipment Freight Insurance Policy Clarification

Due to the high value of these machines, and the sensitivity of the computers and electronics on them, damage during transportation can become very expensive. Asahi/America recommends insuring all welding equipment to the full replacement value and always accept the package from freight carriers with "possible concealed damage".

The condition of the welding equipment is the responsibility of Asahi until it leaves our facility. All rental and purchased equipment is photographed as packaged for freight pick up. Asahi is not responsible for the condition of the tool upon arrival on site. Asahi will offer customer assistance with procuring this machine insurance at time of order if requested. Customers can also choose their own carriers and insurance companies at time of order, at their cost.

All welding tools/machines are FOB Malden MA, regardless of whether they are for purchase or rental. All freight costs for all machines are the responsibility of the customer. This includes to and from the job site for rental equipment.

Asahi is always willing to work with our customers to keep costs down in today's competitive market. Tool freight costs can be minimized if tools ship with material orders that meet the standard "freight allowed" policy. (Tools ship with orders based on availability) Insurance protocols will still be in effect for automated tools even if shipped with material orders.

If you have any questions regarding this policy please contact your District Manager, or call Customer Service at our Malden, MA headquarters at 1-800-343-3618

Please consult Asahi/America's Welding Equipment Price Sheet for purchase and rental rates for all equipment and options.
