## ADDING EFFICIENCY TO THE APPAREL RETAIL WORLD

Checkpoint's Hard Tag @ Source (HT@S) program is an essential component of the company's market leading RF EAS @ Source program. Moving the non-value added labour required to secure merchandise to the most efficient location in the supply chain is a real fashion trend. All Checkpoint HT@S users have realized immediate and significant benefit from eliminating in-store labor, reducing shrink and improving in-stock position.

Checkpoint now offers an entire HT@S portfolio of tags which enables retailers to choose the perfect hard tag, regardless of merchandise category, manufacturing process or marketing approach. This comprehensive and diverse portfolio supports the

best practice of utilizing an assortment of secure merchandising solutions to meet the different needs of all end users. Each HT@S tag is designed specifically for application @Source and is 100% environmentally friendly.

Checkpoint continues to enhance the world-leading position in RF source tagging by adding the HT@S product portfolio to the industry's most comprehensive and dynamic solutions portfolio, including Pocket Tags, FIT™, Integrated Loops and other specialty apparel solutions.

## POWERFUL PROTECTION DOESN'T REQUIRE A PIN

The rate of apparel theft has never been higher as thieves are getting bolder. To counter this challenge, retailers strongly require a powerful solution for open display to reduce shoplifting and keep shrink on an acceptable level.

Checkpoint's Apparel Clip HT@S is ideal for protecting a broad range of apparel merchandise. This innovative solution is the industry's only non-ferrous (pin-free) hard tag. Retailers are finally able to take advantage of the benefits of source tagging merchandise which previously could not be tagged because of stringent needle detection processes mandated by government, industry and consumer advocacy groups.

Ideal prospects for Checkpoint's HT@S solutions, including the Apparel Clip HT@S are specialty, mass and department stores apparel retailers who must comply with a mandatory or self-governed needle detection process at manufacturing or those with a high percentage of ultra light weight fabrics. It is also a great solution when the use of a pin is not a desirable option.

## APPAREL CLIP HT@S – THE BENEFITS

- Strong visual deterrence
- Non-ferrous composite enables application during manufacturing process
- Optimal form and function
  - Industry's smallest & lightest hard tag
  - Does not impact standardized merchandise packaging
  - Fulfills marketing, operations and security requirements
- Only released by self installable detaching key
- Designed for limited reuse @Source
- Retention of residual value: Rebate from the RF HT@S Global Pooling Program™ when returning tags
- Tags available **"Any Quantity, Anytime, Anywhere"**

Specifications: Apparel Clip HT@S	
Part Number:	7282088
Color:	Grey
Tag dimensions:	37.5mm / 1.48" diameter
Frequency:	8.2MHz +/-5% nominal target frequency
Housing:	42.7mm / 1.68" diameter, ABS Plastic
Clip:	22mm / .866" Key Detacher
Detection Performance:	Evolve A, Liberty B
Needle Detection:	Pass, at industry standard)
UOM:	1,000 per case
Weight, Tag w/Clip:	5.1 grams

## SWIVEL KEY DETACHER HT@S

- Self- installed with enclosed permanent adhesive pad
- Easy to use design
- Patented Swivel Key™ design prevents cord from becoming twisted and tangled
- Coiled Lanyard function extends for easy use – retracts back, out of the way
- Small footprint takes up less space at the cash wrap

Specifications: Swivel Key Detacher HT@S	
Part Number:	7144586
Color:	Black and Chrome
Dimensions:	31.8 x 31.8mm
Coil Extension:	1.25 x 1.25" mounting pad Over 24" extension for ease of use.
Materials:	ABS plastic mtg. pad, vinyl coated steel lanyard, Chrome plated metal key
Strength:	> 250 lbs. of pull force.
For Use with:	Apparel Clip HT@S
Keys per box:	1 ea.
