**Checkpoint's 2933 EP Clear Tamper Tag** is a small, clear RF EAS label. It features a visible circuit that guarantees enhanced performance protection, and a clear window space—creating strong visual deterrence while simultaneously protecting brand and product information on packaging. The 2933 Tamper Tag's unique shape and size allow for use on virtually any type of product.

Tamper-resistant adhesive adds to the protection, securing the label permanently to the packaging. Combined with custom tamper-proof printing, this label can be used to combat Organized Retail Crime and resale.

Checkpoint has a solution for virtually every product-protection need, and supports both in-store and source-tagging applications at the point of manufacture.

### Highlights:

- ✓ Reduces shrink by 30% or more and increase sales by 10% or more\*
- ✓ Visible circuit provides greater visual deterrence than plain labels
- ✓ Custom tamper-proof printing options available for store branding, ORC prevention, and more
- ✓ Bonds to all packaging substrates within 27 hours
- ✓ Damages packaging material when removal is attempted
- ✓ Clear viewing window; complements brand and packaging
- ✓ Smaller size, enhanced performance protection
- ✓ Designed to support high-speed @source integration
- ✓ Greener packaging: less material means less waste
