The 3710 EP Micro Cosmetic Label is an anti-theft solution that can increase merchandise protection without decreasing brand visibility. Among RF-EAS solutions, this Checkpoint EP label is a natural fit for high-profile, high-risk uncarded items such as eye and lip liners, lotions and perfumes, jewelry and small electronics—where ordinary labels would obliterate branding and turn off customers. To protect your merchandise *and* your brand, the choice is clear.

Highlights:

- ✓ Elongated, slender shape
- ✓ Clear window for barcodes and branding
- ✓ Advanced RF technology in an AM footprint
- ✓ Designed specifically for small goods
- ✓ Fits virtually any product in any category
- ✓ Tamper-resistant adhesive
- ✓ Custom printing options to combat organized retail crime (ORC)
- ✓ Available exclusively from Checkpoint Systems
